Additional traditional features, list: This is the only flue-cured tobacco barn found to date with the original small door opening, measuring approx. 43” wide by 40” high, framed in 2 ½ inch by 6 inch boards. No other doors have been made into the log walls of this barn. The lapped siding on the gable ends is also unique among those of this type barn, having originally been fairly tightly lapped to keep in the heat for curing.

Alterations and Additions

Has the original barn been altered or added to?

There were shed roof additions on all sides, for burley tobacco and storage, until approx. 2012 when a wind storm blew them off, exposing this intact flue-cured barn underneath.

Outbuildings: a modern equipment shed

Setting and/or Surrounding Land Use: The farm is part of an original landholding of 120+ acres of rolling land at the upper end of Parkway View Road, previously known as Jarvis Road, on Big Branch. The house is a 1960’s era brick ranch style house.

Historic Information: John “Rezi” Jervis was listed as a farmer in the 1850, 1860 and 1870 U.S. Census, and though passing away in 1874, his son William, born in 1841, was listed as either a farm laborer or farmer in 1870, 1880 and 1900 (records not available for 1890). This information, coupled with the general descriptions of the land deeds from the mid-to-late 1800’s, described above, strongly suggests that Rezi Jervis’ son(s) William, James and/ or J.M built the tobacco barn on the Elaine Ray Thomas property.
